

**Federal Agency
Pollution Removal Funding Authorization**

Recipient Agency	U.S. Department of the Agriculture Forest Service - CRGNSA
Address	902 Wasco, Suite 200 Hood River, OR 97031
Agency Locator Code (ALC)	12-40-1100
Agency DUNS	929332484
Agency Tax ID	72-0564834

1. Purpose

This document authorizes reimbursement to the Recipient Agency from the Oil Spill Liability Trust Fund or CERCLA funds for certain removal costs incurred in response to the following pollution incident, Mosier Unit Train Derailment,

Federal Project Number/CERCLA Project Number, FPN E16006 .

This funding authorization is expressly contingent on the Recipient Agency's compliance with all requirements contained herein.

2. Approved Functions and Reimbursement Limit

Costs will be reimbursed only for actions that are directed or approved in advance by the FOSC. Approval may be verbal or written. Assessment, restoration, rehabilitation or replacement of natural resources damaged by the spill are not covered.

Maximum limit of authorization: \$ 8,000

3. Conditions

See attached page(s) for scope of work, special conditions, date of performance, directions or approvals.

4. Period of Authorization

This authorization shall remain in effect until the completion date specified by the FOSC (which normally corresponds to the date of final removal activities).

5. Reimbursement Procedure

Upon completion of removal activities, the Recipient Agency will submit a SF-1080/1081 to the FOSC with detailed records of expenditures and activities for which reimbursement is sought. The agency may elect to use its own records providing an equivalent amount of documentation which has NPFC approval, or the agency may elect to use NPFC's Resource Cost Documentation package. The agency must submit the final request for reimbursement, supported by the required documentation, within 90 days following the completion date. If OMB Circular A-87 cost rates apply, cost certifications must be included. If at the end of the 90 days from final removal activities, there are any costs for which reimbursement has not been requested, written notice will be sent to the agency and 30 days later any balance remaining in the account will be deobligated.

Scope of Work

UPRR Mosier Release

June 2016

UPRR oil train derailed in Mosier, Oregon on June 3, 2016. Sixteen Balken oil cars derailed. Four of the cars released oil. Oil was released on UPRR right-of way and went into the community waste water system. The release occurred within an area adjacent to the Columbia River and in an area that has been occupied by tribal people for thousands of years. It is within lands ceded to the United States in the Treaty of 1855 by the Confederated Tribes of the Warm Springs. Additionally, there are three other Tribes that retain Treaty rights in this area, Confederated Tribes of the Umatilla Indian Reservation, Yakama Indian Nation and the Nez Perce Tribe. Homesteading began in the mid-nineteenth century, the railroad itself was constructed through this area in the 1880s.

Specifically the funding is provided to assist the EPA Federal On Scene Coordinator FOSC to ensure that historic properties are taken into account in their planning for and conduct of the emergency response as per the provisions of the Programmatic Agreement on Protection of Historic Properties During Emergency Response Under the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) 40 CFR Section Part 300.

Mosier area has a high level of prehistorical and historical use. Indian tribal treaty rights apply to this area. The archaeological resources are protected under the NHPA and Tribal rights are protected under the Treaties of 1855. Specifically, USFS personnel have provided or will provide Incident Command with the following support:

- Assist FOSC in complying with the National Environmental Policy Act by minimizing disturbance to significant cultural resources.
- Provide expertise of local cultural resources in support of FOSC pollution removal activities.
- Provide FOSC with local expertise in support of wreck removal activities.
- Coordinate data recovery and archaeological site mitigation activities if needed.
- Conduct surveys as needed to document location of, and impacts to cultural resources.
- Coordinate with Tribal, State and other Federal resource agencies to monitor and protect cultural resources and minimize impacts.
- Provide information to the JIC on cultural resource impacts.
- Monitor for disturbance to trust cultural resources caused by response effort or public. Enforce compliance if necessary.
- Consult with the Responsible Party's Historic Properties Specialist
- Document federal response activities and cost, i.e. salary, equipment, and supplies.

Total PRFA request is \$7000 and is based on the following estimate:

120 hours at \$58.200/hour = \$ **6984**

Dates of performance are from June 4, 2016 until termination of removal activities, or otherwise as directed by the FOSC.

Costs, including but not limited to daily personnel hours, travel, per diem and lodging, equipment use, expendables, and disposal costs shall be documented and supported with invoices. A cost reimbursement package containing this material may be submitted to the Federal OSC periodically throughout the response or upon completion of the response. A final request for reimbursement must be submitted within 90 days following the completion date.
